Data Section

Sustainability Management

In order to realize continuous value creation, the Mitsui Fudosan Group has positioned ESG (Environment, Society, and Governance) as a key management issue, and heralds six material issues for the area. By further evolving neighborhood creation through the pursuit of these goals, the Group aims to achieve a sustainable society and drive sustainable profit growth.

Material issues (priority goals) and initiatives

Relevant SDGs

Reduce environmental impact and generate energy

- Contribute to achieving a decarbonized society by reducing energy usage and greenhouse gas emissions
- Transition to renewable energy for electricity used in business operations
- Build rich natural environments that get better with time

Create new industries through open innovation

- Form worldwide industrial clusters to pool various resources and drive innovation
- Constantly create new value from the customer's perspective through broad-based relations and collaborations

Establish ultra-smart societies by creating neighborhoods

- Leverage technologies to solve individuals' and neighborhoods' problems by building communities and places for people to gather and support one another
- As a country facing issues earlier than others, build neighborhoods that will serve as international problem-solving models

Achieve a society where a diverse workforce can thrive

- •Establish a foundation for everyone to live the life they choose, regardless of individual circumstances
- Provide products and services that expand people's potential and foster expectations and hope for the future
- Promote good mental and physical health and provide products and services to make active, happy lives possible

Continuously improve compliance and governance

- Build a well-structured compliance system to win further trust from society
- Establish a strong and flexible governance system that achieves both growth and stability
