**Building a Cross-Industry Collaboration Framework  
Regarding a Supply Chain-Building Project to Promote the Introduction of  
SAF Using Household Waste Cooking Oil**

SEVEN-ELEVEN JAPAN CO., LTD. (hereinafter “SEVEN-ELEVEN JAPAN”), Ito-Yokado Co., Ltd. (hereinafter “Ito-Yokado”), Mitsui Fudosan Residential Co., Ltd. (hereinafter “Mitsui Fudosan Residential”), Sumitomo Mitsui Banking Corporation (hereinafter “SMBC”), YOSHIKAWAYUSHI Co., Ltd. (hereinafter “YOSHIKAWAYUSHI”), NOMURA JIMUSHO, INC., (hereinafter “NOMURA JIMUSHO”), and ENEOS Corporation (hereinafter “ENEOS”), announced on January 15, 2025 that the seven companies will jointly promote a supply-chain building project to promote the recovery of household waste cooking oil and introduction of Sustainable Aviation Fuel (SAF) using supermarkets, convenience stores, and large-scale condominiums (residential areas) in Chiba Prefecture as bases (hereinafter, the “Project”).

The Project is a proposal for a collaborative scheme by the seven companies that was adopted by the Chiba Prefecture Policy and Planning Department in its call for applications for an “SAF Introduction Promotion Project Using Local Resources in Chiba.” It is the first trial project in Japan to involve collaboration with local government for the creation of an SAF supply chain using household waste cooking oil at convenience stores and in residential areas.

Waste oil is a valuable resource that can be used as raw material for biofuel (SAF, biodiesel, etc.). Currently Japan generates around 100,000 tons of household waste cooking oil per year, and most of this is discarded as combustible waste and not reused.

The Project is intended to promote the following principles:

- resource recycling (utilizing resources that are currently being discarded, such as household waste cooking oil, as much as possible)
- community contribution (promoting Narita International Airport to the international community as a hub airport for Asia), and
- the future (drawing on the knowledge of each company to take on new challenges to leave a comfortable planet for future generations).

Specifically, household waste cooking oil will be collected in Chiba Prefecture from 7-Eleven, Ito-Yokado, and

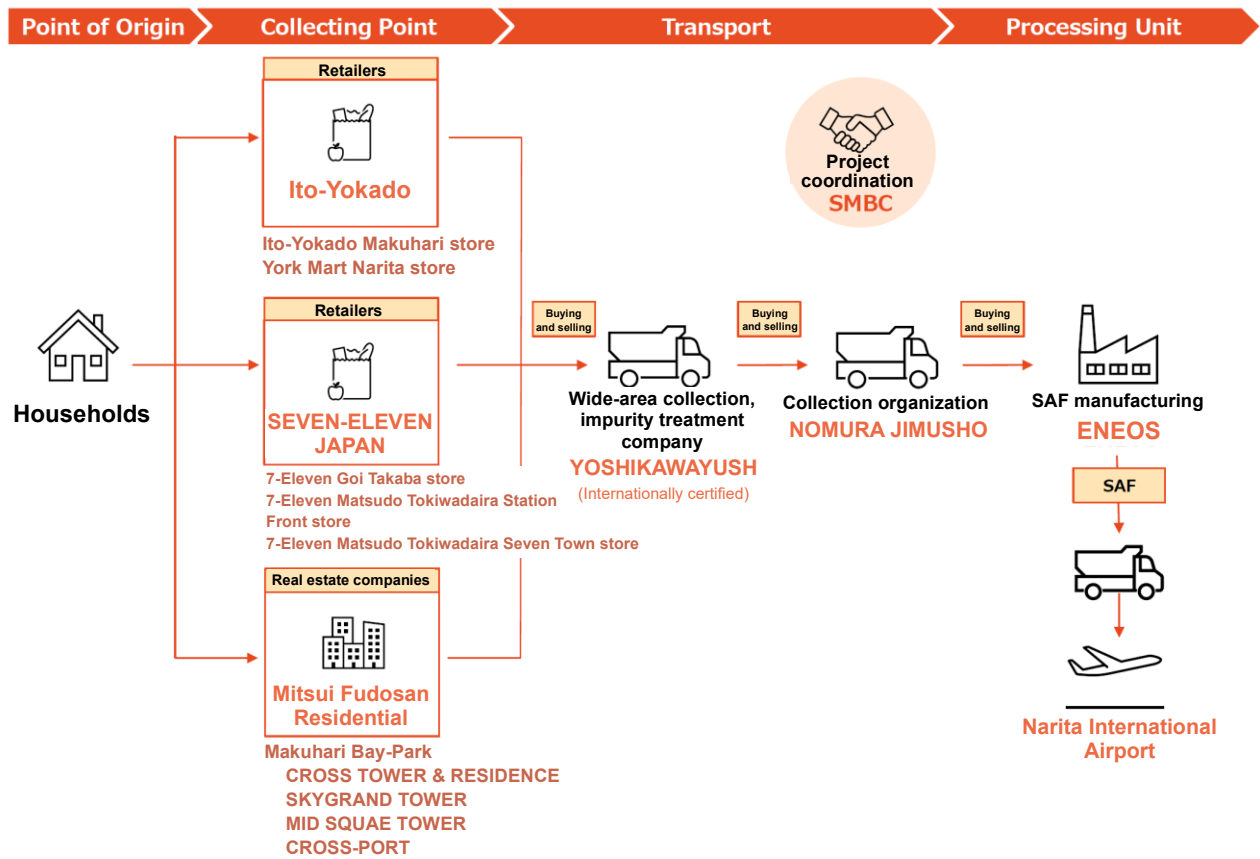

York Mart stores and a large-scale condominium developed by Mitsui Fudosan Residential. The demonstration project will promote use of the oil initially in the manufacture of products such as biodiesel. In the future, the goal is to build a supply chain in which ENEOS will utilize the collected waste oil as raw material for the manufacture of SAF to be supplied to Narita International Airport.

Looking ahead, the seven companies will build a resource recycling model for household waste cooking oil with support from Chiba Prefecture, aiming to realize the building of a supply chain to promote the introduction of SAF.

#### 【Project overview】

Project name	Supply chain-building project to promote the introduction of SAF using household waste cooking oil
Project principals	SEVEN-ELEVEN JAPAN
Project joint operators	Ito-Yokado Mitsui Fudosan Residential Sumitomo Mitsui Banking YOSHIKAWAYUSHI NOMURA JIMUSHO ENEOS
Project content	Collect household waste cooking oil, currently discarded, in Chiba Prefecture at stores and large-scale condominiums Transport the above household waste cooking oil for delivery to SAF manufacturer Public relations and promotional and awareness-raising activities for contributing to the community through the building of a recycled resource model for household waste cooking oil in Chiba Prefecture and strengthening the competitiveness of Narita International Airport by promoting the introduction of SAF
Role of each company	<ul style="list-style-type: none"> <li>▪ SEVEN-ELEVEN JAPAN Collect waste cooking oil from households at stores</li> <li>▪ Ito-Yokado Collect waste cooking oil from households at stores</li> <li>▪ Mitsui Fudosan Residential Collect waste cooking oil from residents at the large-scale condominium, Makuhari Bay-Park</li> <li>▪ Sumitomo Mitsui Banking Project coordination</li> <li>▪ YOSHIKAWAYUSHI Waste cooking oil collection, transport, recycling, and delivery to ENEOS</li> <li>▪ NOMURA JIMUSHO Organization of waste cooking oil collection</li> <li>▪ ENEOS Manufacture of SAF from collected waste cooking oil (2027 onward) Sale of collected waste cooking oil overseas, import of SAF from overseas</li> </ul>

Execution flow
